

Project Summary – April 7, 2025

CTH I
Bridge over Mukwonago River B-67-202
Waukesha County
Project I.D. 3773-05-00/70

Project Overview

The existing bridge on CTH I over the Mukwonago River is a single span concrete slab structure that was built in 1981. The deck surface is delaminated and is beginning to spall. The edges are severely spalled. The guardrail at the bridge is in poor condition and is sub-standard.

The project scope is bridge rehabilitation consisting of concrete deck patching, slab edge repairs, approach paving and guardrail replacement. The project may require some land acquisition and/or temporary easements to construct the project. The highway will be closed to traffic during construction of the project, and a detour will be posted. The project design and construction will use both federal funds and county funds. Design begins in 2025 and extends through 2026. Construction is scheduled for 2027.

Anticipated Schedule

Data Gathering and Design – Summer 2025 through 2026

Public Involvement Meeting – Winter, 2025/2026

Real Estate – Spring 2026 to Summer 2026

Project LET – March, 2027

Construction – 2027
